

PhD candidates wanted

The Laboratory of Structural Biology and Cell Signaling is looking for PhD candidates (m/f/d) at the intersection of Biochemistry, Analytical chemistry and Structural biology. Our young and dynamic group based in the modern, well-equipped research centre BioCeV offers a PhD position from October 2024 – **application deadline 30.4.2024!**

The topic is focused on the development of structural mass spectrometry techniques (H/D exchange, native MS, singlet oxygen labelling, chemical cross-linking, FT-ICR MS top-down with UV and IR lasers) and their implementation in the study of the dynamics of prion proteins, membrane transporters and prenyltransferases.

Funded through MEYS NPO-NEURO-D, OP JAK, INTER-EXCELLENCEZ and CSF.
